PROJECTS

Pizza Web App   **ReactJS, React Router DOM, Material UI**

➢ This is a React-based landing page application that displays a menu of pizza images along with the price. The About Us page and contact us page are also fully responsive.

Fruits Shop Landing Page   **JavaScript, HTML, CSS**

➢ A landing page for Fruits Website in which I converted a Figma PSD into a fully responsive website using above mentioned tech.

Cocktail Database   **ReactJS, Bootstrap, CSS**

➢ A React Based Web Application that shows different cocktails and the preparation method. It uses an API and asynchronously searches for cocktail as soon as the user starts searching.

❖ Now, I am currently working on an e-commerce web app, a music player web app, a Netflix clone, and a streaming web app using technologies like React, Redux, Material UI, Tailwind CSS, and Rest API.
